Testing Phase	Phase 5 — Performance Testing & Quality Assurance

Project Overview:

Project Name: StaffSync

Description: Modern human resource management solution. is a comprehensive web-based application built using the **MERN Stack (MongoDB, Express.js, React.js, and Node.js)** that streamlines and automates various HR processes within an organization. The system provides distinct roles and access levels for **HR personnel, managers, and employees**, ensuring efficient management and transparency across all operations. HR can manage employee data, handle leave approvals, track attendance, and post announcements or news. Employees can apply for leaves, maintain their personal records, mark attendance, and stay updated with company announcements. Managers can oversee leave requests and manage training and development programs for their teams. This centralized platform enhances productivity, improves communication, and promotes a seamless workflow across departments by digitizing core HR functions.

Project Version:v1.0.0

Testing Period: 2025-09-16 to 2025-10-19

1. Domain Mapping & Template Reconciliation

The supplied test scope was adapted from a generic freelance/job portal template to the StaffSync Enterprise HRMS modules below.

Generic Template Scope	StaffSync HRMS Equivalent	Implementation Evidence (as supplied)
User Registration & Login	Multi-Role Authentication Gateway	POST /api/auth/login, POST /api/auth/register, JWT verification
Freelancer / Client Profiles	Staff & Manager Dossier Management	GET /api/employees/:id, PUT /api/employees/:id; contact updates
Job Posting & Application	Training Curricula & Leave Requests	POST /api/training, POST /api/leaves; balance collision guards
Messaging System	Organizational Bulletins & Announcements	GET /api/announcements, POST /api/announcements with urgency tags
Payment Gateway Integration	Leave Balance Ledger & Shift Telemetry	Annual/Sick/Casual balance deduction and worked-hours calculation
Job Status Updates	Request Lifecycle State Machines	Leave Pending → Approved/Rejected; Training In Progress → Completed
Search & Filter	Workforce Directory Filtering	Query by name, department, and Active/On-Leave status
Review & Rating	Manager Review & Milestone Auditing	Manager approval desk, reviewer comments, cohort completion tracking

2. Requirements Traceability Matrix

Requirement	Actor	Target Feature	Acceptance Criteria
REQ-UAT-01	Staff Employee	Self-Service Leave Application	Submit dates within remaining balance; creates Pending request without errors.
REQ-UAT-02	Manager / HR	Leave Approval & Balance Ledger	Approve pending request; balance automatically decrements.
REQ-UAT-03	Manager / HR	Curriculum & Learning Tracks	Create curriculum with modules and duration; persists and appears in team catalog.
REQ-UAT-04	All Users	Cryptographic Authentication	Valid credentials issue signed JWT and route user to role dashboard.
REQ-UAT-05	HR Admin	Directory Governance & Personnel CRUD	Add/edit staff record; changes reflect across directory queries.
REQ-UAT-06	HR Admin	Internal Bulletins & Urgent Broadcasts	Publish High-priority announcement; targeted staff see notice.
REQ-UAT-07	Staff Employee	Attendance Shift Telemetry	Clock In records timestamp; active timer runs; Clock Out computes hours.

3. Comprehensive UAT Test Cases

UAT-01: Authentication & Role Gateway Routing

Preconditions: Verified accounts exist for HR, Manager, and Employee roles.

Test Steps: 1. Navigate to /login.
2. Enter the test account credentials.
3. Click “Sign In to Dashboard”.

Expected Result: HTTP 200; JWT stored in localStorage; user redirected to /hr/dashboard.

Actual Result (as supplied): The supplied report states authentication succeeded, JWT was decoded, and the HR Dashboard opened.

Status (as supplied): PASS

UAT-02: Employee Self-Service Leave Application

Preconditions: Employee has 14 remaining Annual Leave days.

Test Steps: 1. Open /employee/leaves as Employee.
2. Click “Apply for Leave”.
3. Choose Annual Leave, select a 3-day duration, and enter a reason.
4. Submit the form.

Expected Result: Balance is validated; request is saved as Pending and appears in the leave table.

Actual Result (as supplied): The supplied report states POST /api/leaves returned 201 Created and the pending record appeared.

Status (as supplied): PASS

UAT-03: Manager Leave Review & Balance Deduction

Preconditions: A pending leave request from UAT-02 exists.

Test Steps: 1. Open /manager/leaves as Manager.
2. Locate the pending request and add a review comment.
3. Click “Approve”.

Expected Result: Status changes to Approved; annual leave balance changes from 14 to 11.

Actual Result (as supplied): The supplied report states PUT /api/leaves/:id/status returned an updated record and the balance became 11.

Status (as supplied): PASS

UAT-04: Manager Training Curriculum Creation

Preconditions: Manager is logged in at /manager/training.

Test Steps: 1. Click “New Curriculum”.
2. Enter title, department, duration, and module count.
3. Click “Publish Program”.

Expected Result: Server validates manager role; curriculum is persisted and appears in training tracks.

Actual Result (as supplied): The supplied report states the record persisted in MongoDB Atlas and a new card appeared.

Status (as supplied): PASS

UAT-05: Attendance Clock-In / Clock-Out

Preconditions: Employee has not clocked in that day.

Test Steps: 1. Open /employee/attendance.
2. Click “Clock In” and verify active status/timer.
3. Click “Clock Out”.

Expected Result: Server calculates shift duration; attendance record contains timestamps and Present status.

Actual Result (as supplied): The supplied report states clock-in and clock-out endpoints recorded ISO timestamps and computed hours.

Status (as supplied): PASS

UAT-06: Priority Announcement Publishing

Preconditions: HR Administrator session is active.

Test Steps: 1. Open /hr/announcements.
2. Click “New Bulletin”.
3. Set priority to High, audience to All, and enter the announcement title.
4. Submit.

Expected Result: Announcement persists and appears on authorized employee dashboards with a high-priority indicator.

Actual Result (as supplied): The supplied report states the bulletin was saved and visible across authorized dashboards.

Status (as supplied): PASS

UAT-07: Search, Filter & Department Querying

Preconditions: Employee records exist across Engineering, HR, and Sales.

Test Steps: 1. Open /hr/employees.
2. Search for “Parikshit”.
3. Select Department: Engineering.

Expected Result: Results filter without a full page reload and hide non-matching records.

Actual Result (as supplied): The supplied report states filtering was immediate/debounced and non-matching records were hidden.

Status (as supplied): PASS

UAT-08: Cold-Start Recovery & Error Resilience

Preconditions: Render backend may be sleeping in a free-tier idle state.

Test Steps: 1. Trigger login on the supplied StaffSync deployment.
2. Observe request behavior during backend wake-up.

Expected Result: A 60-second client timeout accommodates the reported cold-start window without a premature failure.

Actual Result (as supplied): The supplied report states the request completed after container wake-up without a false-positive abort.

Status (as supplied): PASS

4. Acceptance Summary & Sign-Off

Metric	Reported Result	Target	Verdict
Total Test Scenarios	8	8	100% Executed
Passed Scenarios	8	8	100% Pass Rate
Failed / Blocked	0	0	Zero reported
Live MongoDB Atlas	Verified (as supplied)	100% live data	Met (as supplied)

Cross-Origin Security	Verified (as supplied)	Vercel CDN ↔ Render API	Met (as supplied)

Final UAT Verdict (as supplied): ACCEPTED FOR PRODUCTION

Note: Test results and implementation evidence in this document are transcribed from the supplied report and have not been independently verified. Credentials have been omitted from the report body for security.
